

markanthony germanos

speaker • trainer • author

What people are saying

“Mark is a talented and skilled speaker and author and he brings a fresh and comprehensive approach.”

—General Robert Hipwell, U.S. Army (retired)

“I had the pleasure to attend Mark’s class at the CMIA connect 2022. I learned great information on how to secure a WiFi network. I have been involved in IT since 2000. Thank you for the great information.”

—Dr. Jeffrey Smoot, DCompSci, MBA

“Mark’s presentation was engaging and informational. Not one person left the workshop without knowledge and confidence that they would be far more diligent in the future with their cyber security. His lessons were put to immediate use.”

—Tanya Tate, Legal Assistant Paralegal

Now presenting

- How Hacks Happen
- You Can’t Hide WIFI
- Be the High Hanging Fruit

Benefits

- *Your attendees become empowered.* They learn how to protect the confidentiality, integrity and availability of their data, network and reputation.
- *Your attendees benefit* from Mark’s Point→Story→Takeaway approach to educate and entertain. Mark makes a point, presents a story to show the point in action and then shares the takeaway. Previous attendees have contacted Mark and shared how clear their recall was...several months after Mark’s presentation.
- *Workshops are more* than 40% audience-interactive. Attendees create friendships. Coworkers strengthen relationships.

A few years ago, Mark found an unauthorized \$1,000 charge on his VISA bill. Learning how this happened led him into the security awareness arena. Everybody’s security is too weak. Mark preaches an ounce of prevention is a pound of cure. That’s why he stopped training social media and switched **exclusively** to cybersecurity. You have to be careful. You have to be cautious. You have to be vigilant...on the Internet. Mark helps you and your attendees become safer online.
